

## Executing Post Deployment Steps

In order to complete the OIM installation, one would need to execute few manual post deployment steps

Follow below steps to execute the required steps

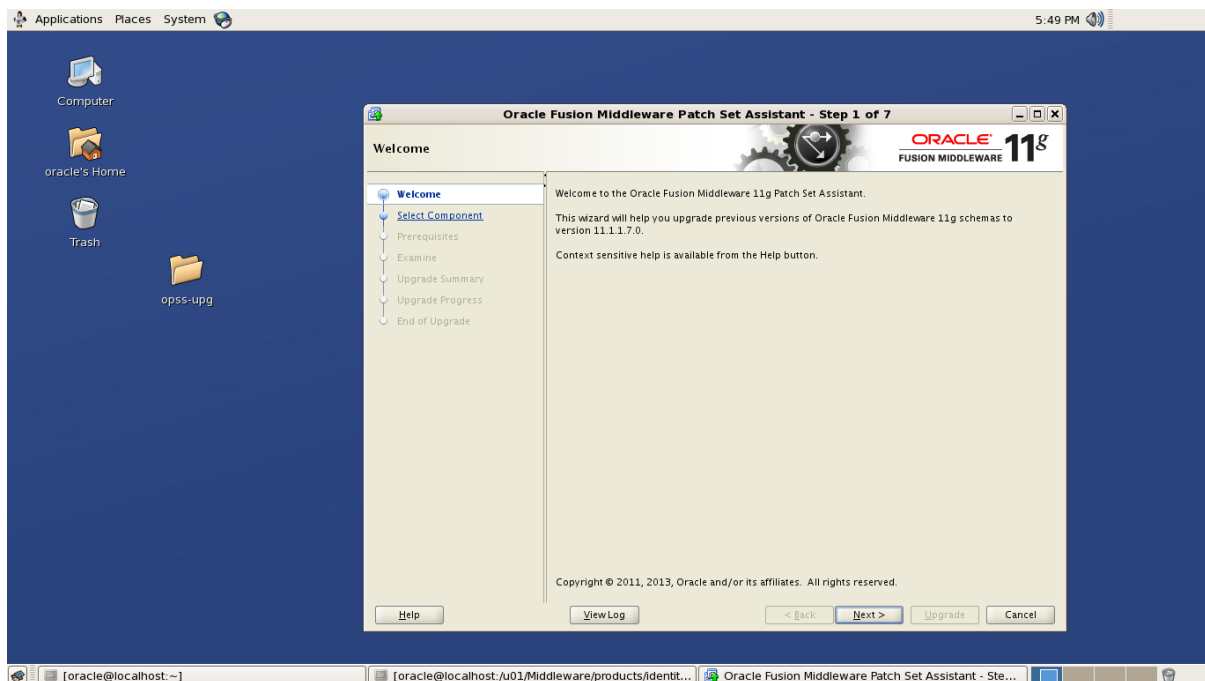

### Upgrade OPSS schema

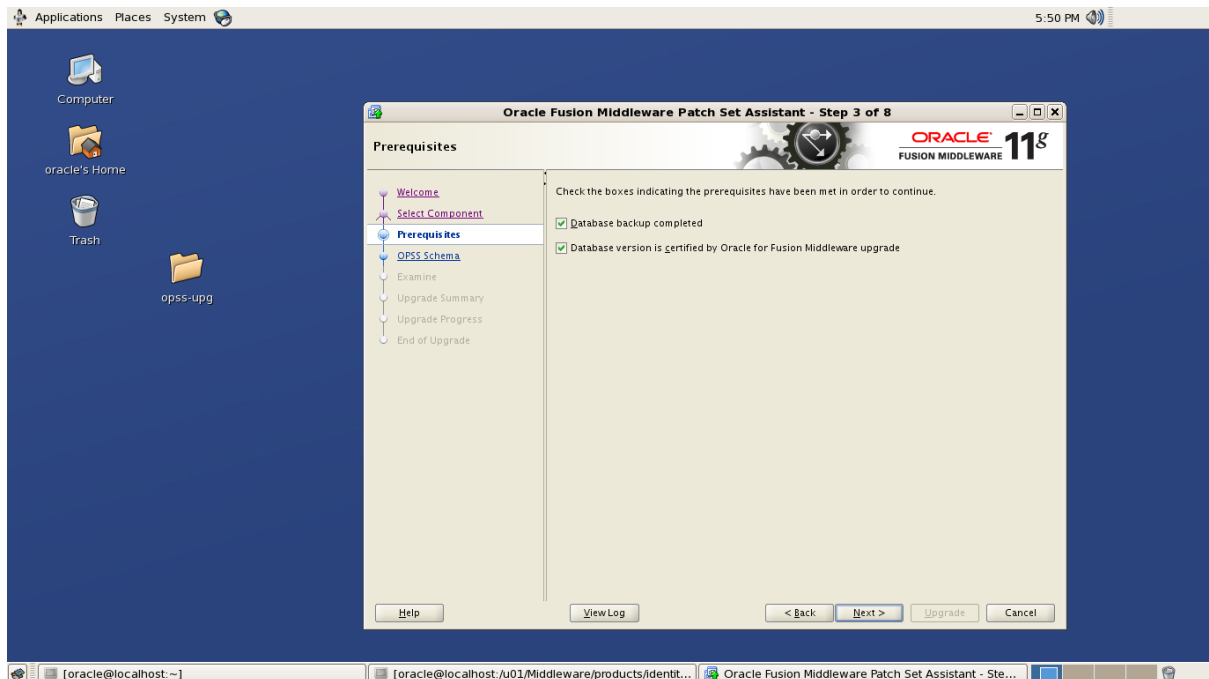

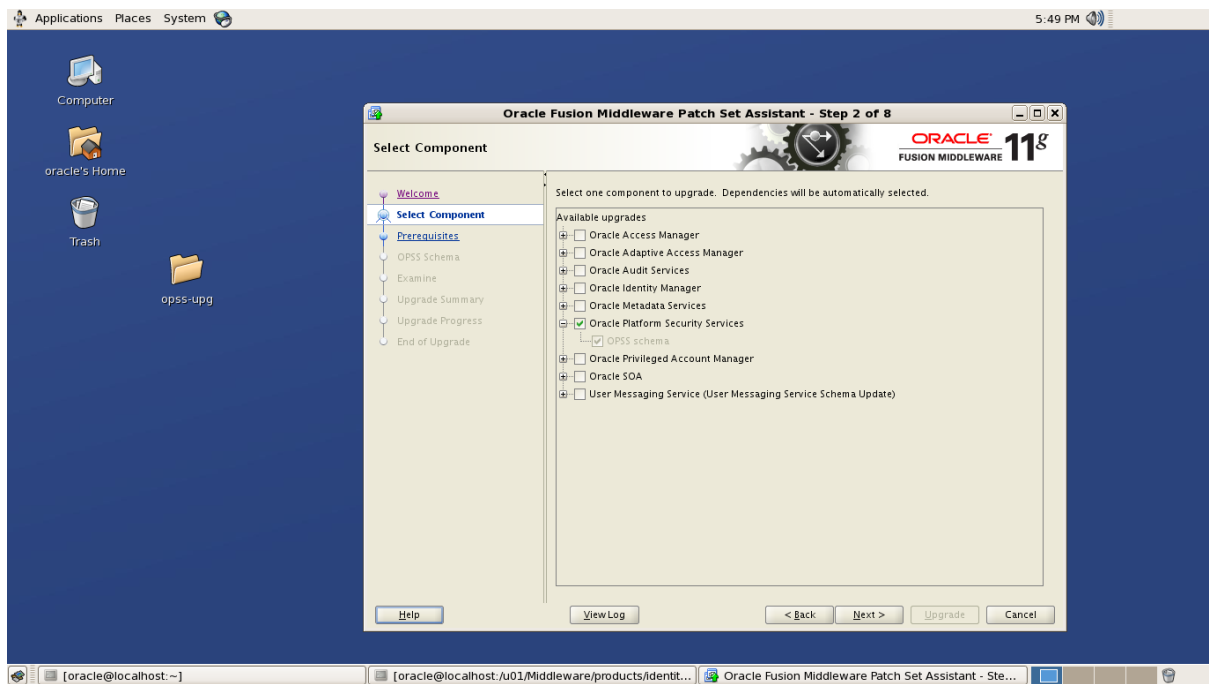

```
cd /u01/Middleware/products/identity/oracle_common/bin
```

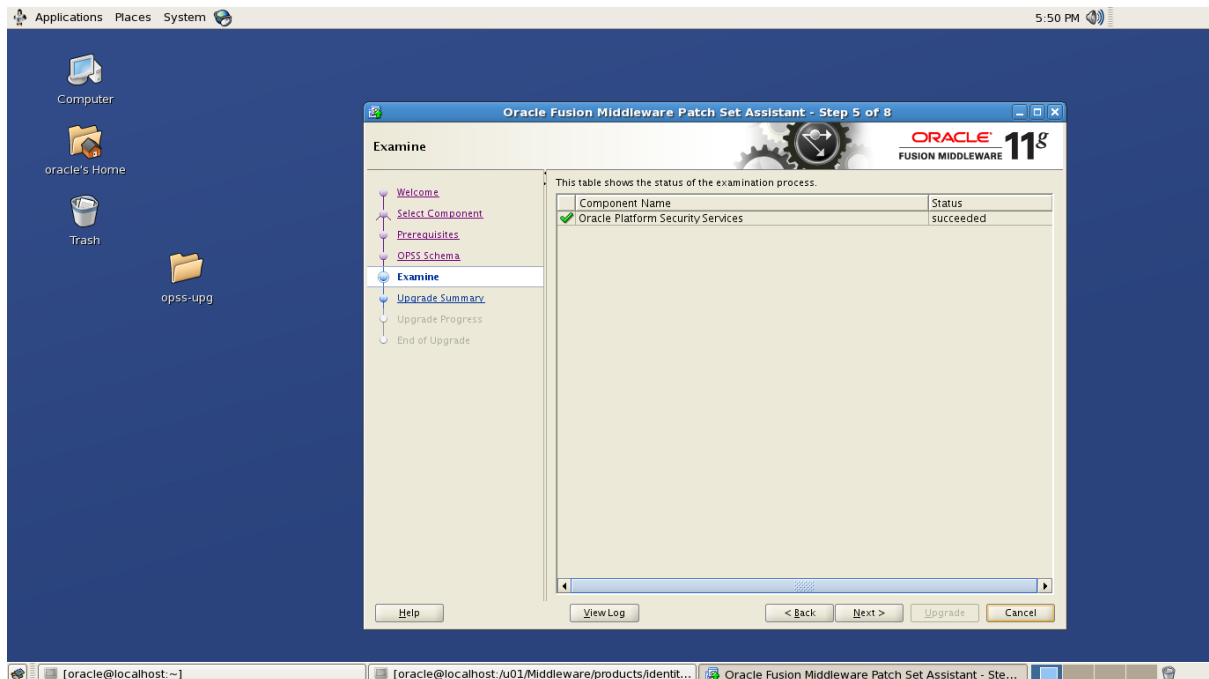

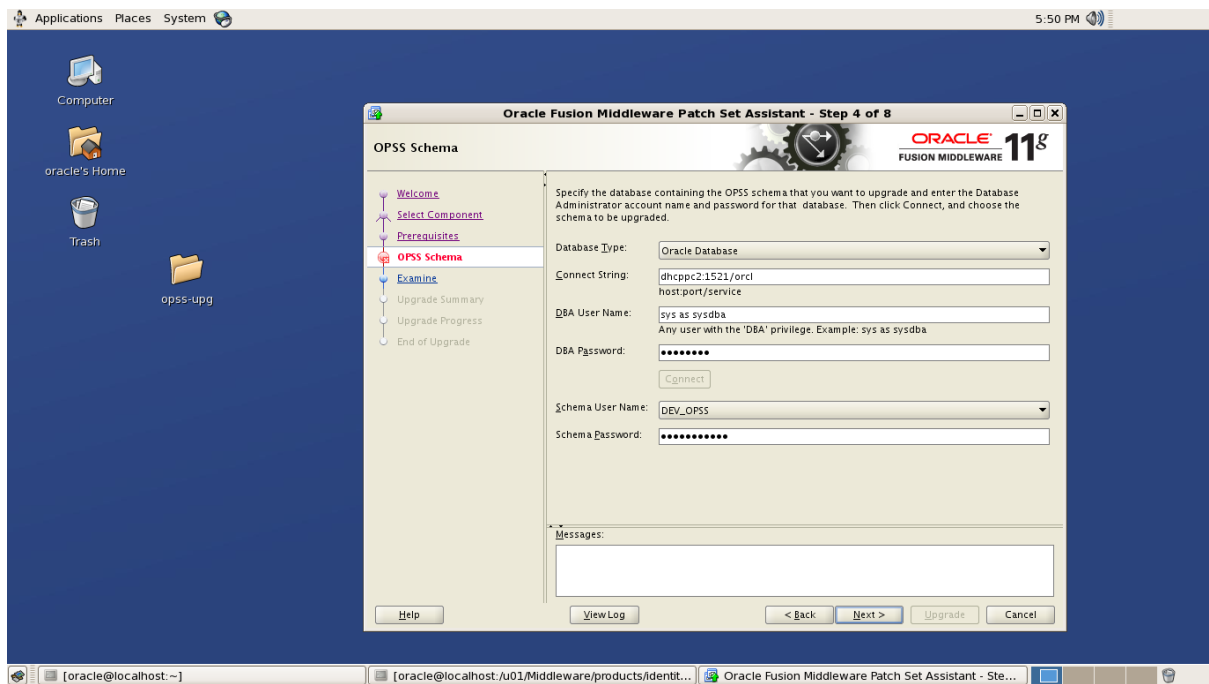

```
./psa
```

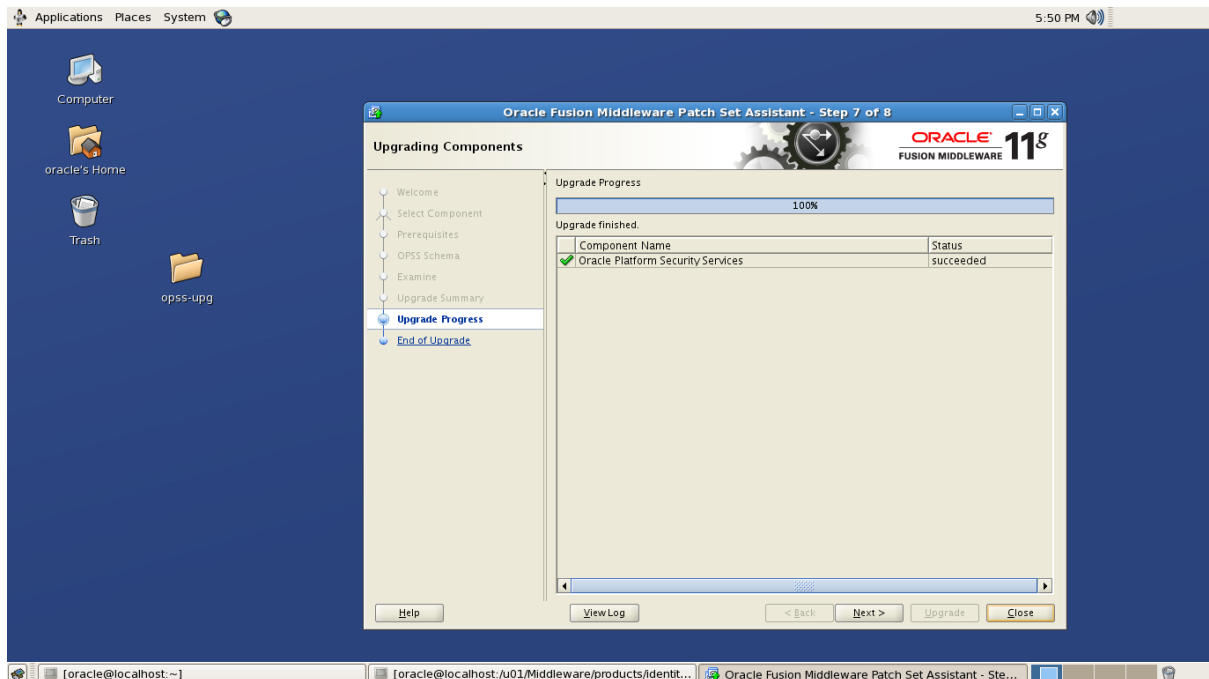

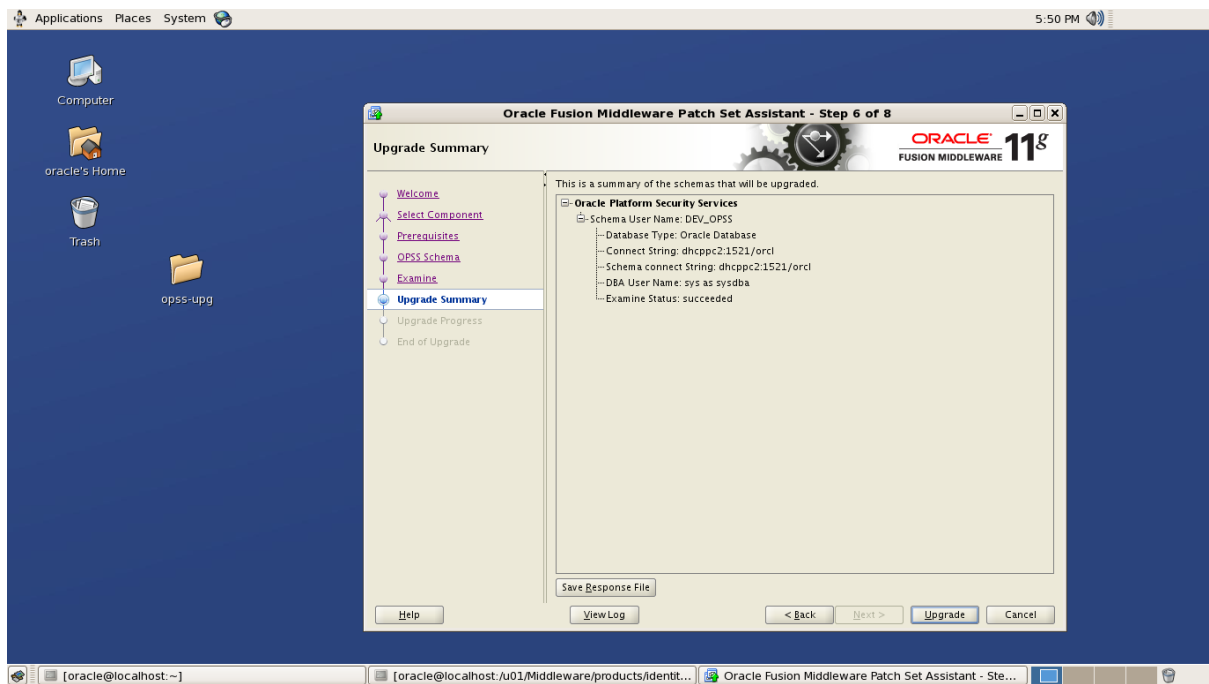

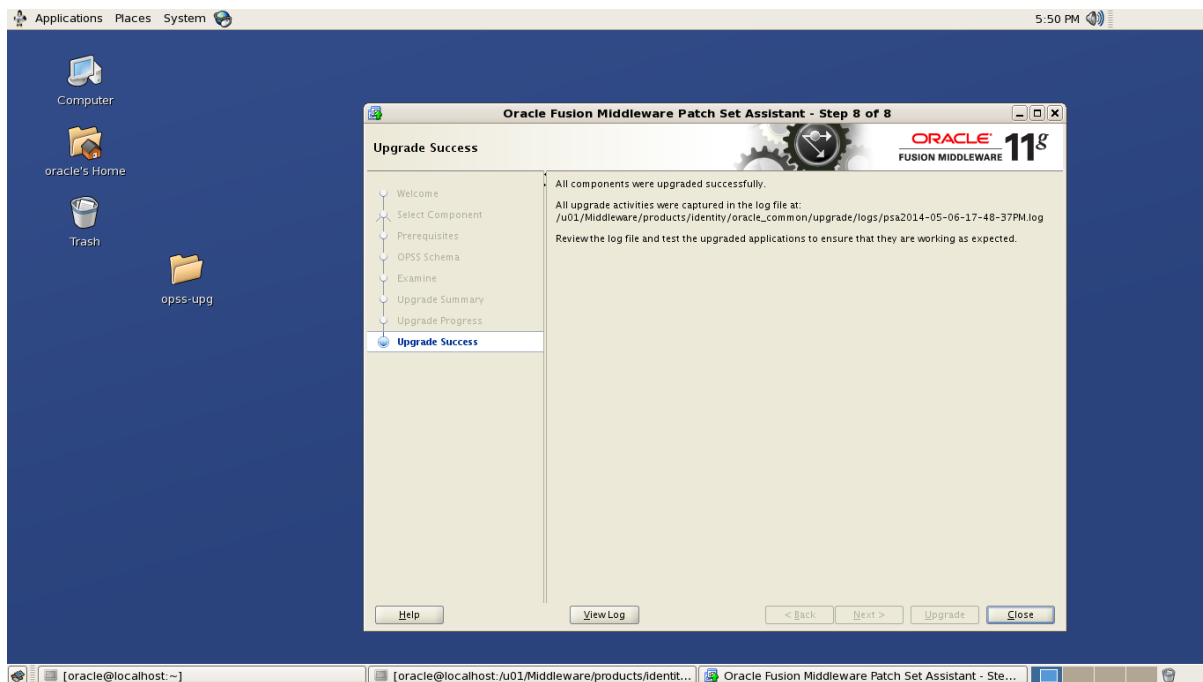

```
oracle@localhost:/u01/Middleware/products/identity/oracle_common/bin
File Edit View Terminal Tabs Help
[oracle@localhost ~]$ cd /u01/Middleware/products/identity/oracle_common/bin
[oracle@localhost bin]$ pwd
/u01/Middleware/products/identity/oracle_common/bin
[oracle@localhost bin]$ ./psa
```

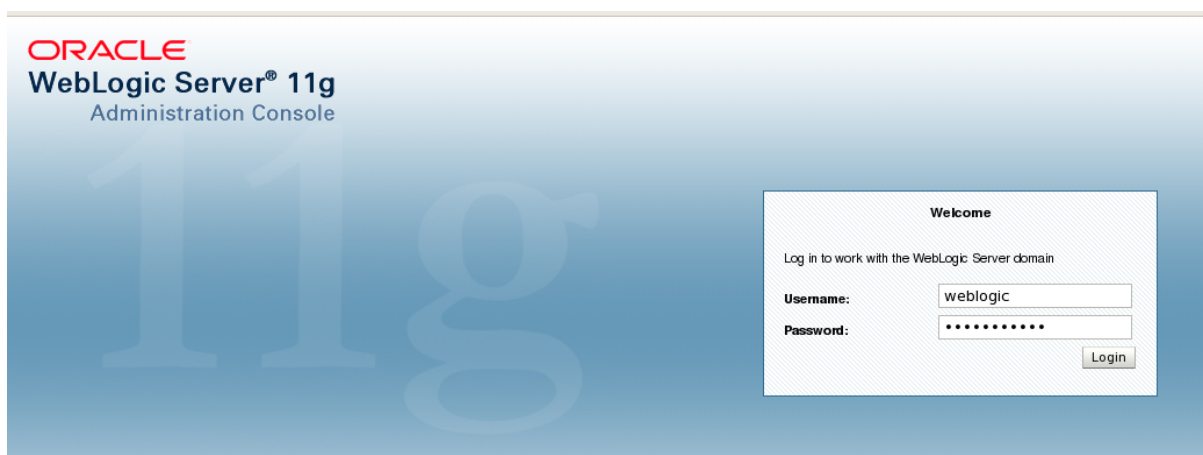

Restart Admin, SOA and OIM servers

### Changes to OIM Managed Server

**Note:** Make sure Admin and OIM managed server are up and running

Log into Weblogic Admin Console and execute below steps

Configuration | **Monitoring** | Control | Security | Web Service Security | Notes

**Health** | Servers | Clusters | Migration

This page allows you to monitor health information for this domain.

Health:  Filter

**Health Information**

Showing 1 to 3 of 3 Previous | Next

Server/Subsystem Name	State	Health	Reason
AdminServer	RUNNING	OK	
wls_oim1	RUNNING	OK
