Setting Up The IAM Deployment Wizard

This process sets up the *Oracle IDAM Deployment Repository Lifecycle Management Tools (LCM)* which drive the actual installation and configuration process

Execute the below commands to initiate the process and follow the screenshots

cd /u01/oracle_idam_installer/ofm_iam_deployment_repo/installers/idmlcm/Disk1

./runInstaller -jreLoc /u01/oracle_idam_installer/ofm_iam_deployment_repo/installers/jdk6
